

A PROACTIVE APPROACH THAT VIRTUALLY ELIMINATES INCONVENIENT FLAT TIRES THAT ARE CAUSED BY ROAD HAZARDS!

Ethylene Glycol, combined with a proprietary sealant formula, causes the sealant to convert into a permanent liquid form that continues to layer the inner liner and rim so that it can promptly fill and seal any ¼" puncture in the tread area of the tire, while driving, eliminating the need to service or replace the tire. Effortless installation through the valve stem.

Pays for itself by increasing treadwear and reducing repair bills!!!

COVERAGE NOW AVAILABLE FOR Vehicles For Hire, Rentals, Taxis, Municipality and Corporate Vehicles!

PERFORMANCE FACTS

- ✓ Automatically extends tire life by consistently maintaining air pressure.
- ✓ Reduces heat buildup and keeps tires running cooler.
- ✓ Prevents bead, porosity and valve stem leaks.
- ✓ When properly balanced prior to installation, sealant will not affect tire balance.
- ✓ Does not affect most tire pressure monitoring systems.
- ✓ Formula contains rust inhibitors to prevent rust on valve stems, steel belts and rims.
- ✓ Specially formulated to prevent freezing at extremely low temperatures (-35°F) and separation at high temperatures up to 300°F.
- ✓ Will not void most tire manufacturer warranties.

If the puncture is larger than ¼", we have that covered too! Licensed & Insured Protection Programs are available in all 50 states and includes 24/7 Roadside Assistance designed to minimize any disruption.

Cars ☺ Trucks/SUV ☺ RVs ☺ Trailers ☺ Motorcycles ☺ ATVs

A specialty sealant formula is required for vehicles operated off the road.
